

INTELLIGENCE RESEARCH & DEVELOPMENT COUNCIL

19 August 1981

Chairman IR&DC

Duk -
Attached please find an invitation to you from Summer Shapiro for the Navy to present a briefing to the IR&DC concerning their methodology which they are developing [redacted] to identify critical technologies and depending on their maturity to then recommend necessary export controls. STAT

I have talked to [redacted] who has heard the brief and he agrees it is worthwhile. STAT

I suggest we schedule the brief for our next IR&DC meeting, in October. If you agree, I will work with his contact point, [redacted] to arrange. STAT

MEMORANDUM FOR THE CHAIRMAN OF THE INTELLIGENCE RESEARCH AND
DEVELOPMENT COUNCIL

Subj: Technology Transfer (U)

1. (S) The Navy has established a program to identify critical technologies, assess the relative international maturity of these technologies, and recommend necessary export controls. This program was initiated in response to the Export Administration Act of 29 September 1979. As a part of this program a procedure and methodology has been developed. It is evident in applying this methodology that both the U.S. research and development community and the intelligence community must interact closely in order to establish and maintain a useful technology transfer data base.

2. (U) Since this subject is relatively new and of high visibility in the Department of Defense, it should be of interest to members of the IR&DC. If you concur that a briefing on this subject would be beneficial, briefings which have been prepared by the Naval Research Laboratory (NRL) and the Naval Intelligence Support Center are available. [redacted] has already received the NRL brief. I would appreciate any comments, suggestions and criticisms you may have after hearing these briefs. My point of contact on this subject is [redacted] OP-009T, (202) 697-3299.
